A note of congratulations to @jeffreygoldberg on the occasion of his promotion to editor in chief of the Atlantic

Jeffrey Goldberg is the personification of chronic elite non-accountability. He made his journalistic bones promulgating phony, discredited theories positing a link between Iraq and Al Qaeda (2002) the fruits of which were then cited by Dick Cheney as a top reason why everyone had to line up behind the invasion of Iraq. Far from suffering professional repercussions for this odorous malfeasance, Goldberg accrued additional prestige, which he later deployed in yet another discredited article agitating for a US-backed Israeli attack on Iran (2010). Jeffrey has also built up a reputation as someone anonymous "US officials" can run to when they want to air petty grievances, deploying his journalistic acumen for this purpose when he reported an unnamed official calling Netanyahu "chickenheart" (2014) - this then provoked a mini diplomatic crisis forcing John Kerry to issue a very serious apologetic statement. And who can forget Jeffrey's lauding profile of Chris Christie (2012) in which the two attended a Bruce Springsteen concert together, presumably dancing to "Born to Run" in each other's arms. I still wonder if they also gave each other a big wet smooch at the end of the night.

Anyone in non-elite fields who had committed these kinds of drastic, destructive errors would've received severe professional sanction. Conversely, Jeffrey gets promoted as editor of one of the nation's premier opinion journals. To quote Rh. Collins: "That's just the way it is."

“ Movement across borders creates the most extreme conflict between individual liberty and democratic sovereignty. The former says that people should be allowed to move where they like. The latter says that citizenship is a collective property right, access to which citizens control. Meanwhile, businesses view the ability to hire freely as invaluable. It is not merely unsurprising that migration has become the lightning rod of contemporary democratic politics. Migration is bound to create friction between national democracy and global economic opportunity.”
